Sensor, Safety Tram Fall Protection  
On Top Of Tank

Both Trucks Feature The Klein **SmartSpray™** for exact water control independent of the engine speed for maximum control and safest operation. The **SmartSpray™** System can save you over 30% water usage compared to your existing rigid, or articulated water trucks.

These trucks utilize the most efficient water pumping system in the world with the Klein KP4H 1,200 GPM, **SmartSpray™** hydraulic driven water pump. The Klein system will ensure years of worry free, low maintenance performance under the most adverse conditions.

The Klein **SmartSpray™** hydraulic control system facilitates pump operation at any desired rate, while maintaining almost complete independence of truck ground speed.

Extreme Duty Western Star **4900XD/6900XD** chassis provides lower operating costs and longer chassis life vs a rigid frame truck or articulated truck that you are currently using.
